In mathematics, a group is an algebraic structure consisting of a set of elements equipped with an operation that combines any two elements to form a third element and that satisfies four conditions called the group axioms, namely closure, associativity, identity and invertibility. One of the most familiar examples of a group is the set of integers together with the addition operation, but the ...

Solid modeling (or modelling) is a consistent set of principles for mathematical and computer modeling of three-dimensional solids. Solid modeling is distinguished from related areas of geometric modeling and computer graphics by its emphasis on physical fidelity. Together, the principles of geometric and solid modeling form the foundation of 3D-computer-aided design and in general support the ...

Dans le plan  $\mathbb{C}$  Toute application  $f$  continue d'un disque fermé  $\mathbb{D}$  dans lui-même admet au moins un point fixe [5].

### **Théorème du point fixe de Brouwer - Wikipedia**

En mathématiques, le théorème fondamental de l'algèbre, aussi appelé théorème de d'Alembert-Gauss et théorème de d'Alembert, indique que tout polynôme non constant, à coefficients complexes, admet au moins une racine. En conséquence, tout polynôme à coefficients entiers, rationnels ou encore réels admet au moins une racine complexe, car ces nombres sont aussi des complexes.
