

esterification methods reactions and pdf

The Steglich esterification is a variation of an esterification with dicyclohexylcarbodiimide as a coupling reagent and 4-dimethylaminopyridine as a catalyst. The reaction was first described by Wolfgang Steglich in 1978.

Steglich esterification - Wikipedia

In organic chemistry, transesterification is the process of exchanging the organic group R³ of an ester with the organic group R² of an alcohol. These reactions are often catalyzed by the addition of an acid or base catalyst.

Transesterification - Wikipedia

ESTERIFICATION This article describes methods for the production of carboxylic esters: For the properties of these compounds, see ESTERS, ORGANIC. For esters of inorganic acids, see the articles on nitric acid, phosphoric
