ASME, PED, IBR compliance - a passport to key markets Business Challenge. In most countries, manufacturers of boilers and pressure vessels must comply with strict regulations and codes in order to market their equipment. This is their "license to operate". In Europe, USA, India and many other countries, boilers and pressure vessels must comply with respectively the Pressure Equipment ...

A Revolution in Piping Design and Analysis: FEATools, PRG is proud to announce that Intergraph is now selling, distributing, and providing support for a new PRG product called FEATools. This product is a valuable collection of easy to use FEA analysis modules and a CAESAR II FEA "Translator" (conversion program) that will significantly improve designs and stress analysis of piping systems.

National Board Inspection Code Report Forms. The National Board recommends the Electronic Data Transfer (EDT) system for the completion and registration of data report forms. It is an interactive document management system that both simplifies and expedites the process of registering data reports, conveniently accomplished through the Internet.

## **A BRIEF DISCUSSION ON ASME SECTION VIII DIVISIONS 1 AND 2**

Maximum allowable operating pressure or MAOP refers to the wall strength of a pressurized cylinder such as a pipeline or storage tank and how much pressure the walls may safely hold in normal operation. The MAOP is less than the MAWP (maximum allowable working pressure). MAWP being the maximum pressure based on the design codes that the weakest component of a pressure vessel can handle.
