class on device physics which I (Umesh Mishra) took over when I arrived at UCSB in 1990. I developed the class over the past 15 years using his notes as a foundation and the new content is reflected in this book. I am grateful to Prof Kroemer for allowing me to include parts of his notes and homework problems in this book.

hole will drift through the semiconductor. and a function of the scattering or collision processes within the semiconductor. Two scattering mechanisms are lattice scattering and impurity scattering. Lattice scattering occurs because atoms in a semiconductor contain a certain amount of thermal energy in the form of atomic vibrations.
